ORBITAL REACHES SUPPLY AGREEMENT WITH FORD AUSTRALIA

PERTH, AUSTRALIA – 07 May 2009: Orbital Gas Products (OGP), a division of Orbital Corporation Limited (ASX: OEC – 'Orbital') has reached an agreement with Ford Australia that will significantly boost Orbital Gas Products' interests in the Australian LPG Autogas market.

OGP has been appointed as the OEM supplier of a new-generation LPG system for Ford Falcon models.

The new contract will commence in the second half of 2010.

It will see a continuation of OGP's long-running relationship with Ford, under which it supplies the LPG system for the current Falcon E-Gas model.

Orbital Gas Products was formed in July 2008 following the acquisition by Orbital of Boral Alternative Fuel Systems and its Ford OEM supply contract.

Ford's Falcon E-Gas models are the only factory-fitted LPG-dedicated vehicles on the Australian market and represent more than 25 per cent of total Falcon sales.

"Orbital Gas Products' relationship with Ford is the foundation for our LPG business strategy, the benefits of which we believe will be seen by Orbital and its shareholders for many years to come," said Orbital's CEO Terry Stinson.

Orbital Gas Products' Managing Director, Tony Fitzgerald, says that once supply commences, the new Agreement will see the company deliver more content to Ford, resulting in significantly greater revenues.

In addition to the Ford business, Mr Fitzgerald expects Orbital Gas Products to expand significantly through the planned introduction of new generation LPG technology to the After-OEM and retrofit markets commencing in the second half of 2009.

"Ford's agreement to open a new chapter in OGP's successful E-Gas supply arrangement will allow Orbital to further develop our expertise in alternative fuel engine technology right here in Australia," said Mr Fitzgerald.

Orbital has entered into agreements with Vialle, Continental and Docklands Science Park for access to their LPG components, technology and patent portfolios.
